

EVAN J. ARENA

Ph.D. Student \diamond Department of Physics \diamond Drexel University
Disque Hall, Office No. 705 \diamond 32 S. 32nd St. \diamond Philadelphia, PA 19104, USA
+1 \cdot (516) \cdot 383 \cdot 4817 \diamond evan.james.arena@drexel.edu

RESEARCH INTERESTS

Theoretical astrophysics and cosmology, including large-scale structure, 21 cm cosmology, dark energy, inflation, general relativity, modified gravity, gravitational lensing, dark matter, radio astronomy, and gravitational waves.

EDUCATION

| | |
|--|----------------|
| Drexel University Ph.D. Student of Physics | 2018 – Present |
| Stony Brook University B.S. in Physics and Astronomy/Planetary Sciences <i>Cum Laude</i> <i>Departmental Honors in Physics</i> | 2013 – 2017 |

POSITIONS HELD

| | |
|--|----------------|
| Drexel University <i>Graduate Research Assistant and CoAS Dean's Fellow</i> Department of Physics | 2018 – Present |
| Stony Brook University and Brookhaven National Laboratory <i>Research Assistant</i> SBU Department of Physics & Astronomy and BNL Department of Physics | 2015 – Present |
| Brookhaven National Laboratory <i>Intern</i> Department of Physics | 2012 – 2013 |

AWARDS AND HONORS

| | |
|--|------|
| <i>College of Arts and Sciences (CoAS) Dean's Fellowship</i> , Drexel University | 2018 |
| <i>Sigma Pi Sigma National Physics Honor Society Member</i> , Stony Brook University | 2017 |
| <i>Presidential Scholarship</i> , Stony Brook University | 2013 |

RESEARCH HISTORY

| | |
|----------------|---|
| 2018 – Present | Gravitational Lensing Study of the second-order weak gravitational lensing effect known as Flexion. |
| 2015 – Present | Low redshift 21 cm intensity mapping Cosmological parameter and modified gravity forecasts for a general 21 cm cosmology experiment, member of the DOE Cosmic Visions Dark Energy 21 cm Working Group, and design and construction of the radio telescope used for the 21 cm Baryon Mapping eXperiment at Brookhaven National Laboratory. |
| 2013 | Gravitational Waves Proposed a new method for the indirect detection of gravitational waves via precision stellar redshift measurement. |

2012

Modified Newtonian Dynamics

Investigated the plausibility of Modified Newtonian Dynamics on a local scale based on rotation curves of the Milky Way.

PROFESSIONAL ACTIVITIES AND SERVICE

Working Groups Member of the DOE Cosmic Visions Dark Energy 21 cm Working Group

Collaborations Member of the Large Synoptic Survey Telescope Dark Energy Science Collaboration (LSST-DESC)

TEACHING

Drexel University

Teaching Assistant

PHYS 154, *Introductory Physics III* (Recitation and Lab Instructor) Fall 2018 PHYS 100,
Preparation for Engineering Studies (Recitation Instructor) Winter 2019

Stony Brook University

Lecturer

Della Pietra High School Applied Math Program Spring 2017

TALKS AND PRESENTATIONS

“Observation of gravitational waves through precision stellar redshift measurement”
High School Research Program conference, Brookhaven National Laboratory August 2013

“Dark Matter and its alternatives” (Poster)
High School Research Program poster session, Brookhaven National Laboratory September 2012
